## An Economical Choice Offering Exceptional Performance

The DIGI® Summit 3000 Series provides exceptional performance in light industrial and legal-for-trade applications. While value-priced, the Summit 3000 also employs a rugged design to deliver efficient installation and operation.

The convenient top-access junction box is housed in a durable ABS enclosure and is protected from fork trucks and other industrial abuse by the Summit 3000's diamond treadplate steel deck. The scale has fully adjustable, rigid polyurethane rubber feet to accommodate weighing on uneven surfaces.

The load cell cable exits the weldment towards the interior of the scale, allowing you the flexibility to route it out any side of the scale to the digital weight indicator. This also means the indicator load cell cable is at floor level—reducing the potential for damage.

## Expanded Weighing Options

Use the Summit 3000 in conjunction with a counting scale to expand weighing capabilities in counting and inventory applications.

## STANDARD FEATURES

- Four NTEP-certified alloy steel shear beam load cells
- Top access junction box
- Rugged diamond safety treadplate steel deck
- Four adjustable rigid polyurethane rubber feet, 3" (76.2 mm) diameter
- Signal trim summing board housed in ABS enclosure
- One threaded eyebolt hole located in the center of the weldment for easy lifting
- 20 ft of EL147 load cell cable
- Conduit for additional load cell cable protection

## OPTIONS/ACCESSORIES

- Floor anchor plates, mild steel (set of two)
- Four drilled deck holes for scale height adjustment

### Pit Frames

For applications requiring a pit-installed floor scale, frames are available to complete the package.

### Access Ramps

For easy access in above ground applications, simply add a ramp to your floor scale set-up.
